

Panel Rib[™] Roof System

When schedules are tight, budgets matter or long-term performance can't be left to chance, the Panel Rib roof system is a dependable option from the very start.

It's a straightforward solution designed to help builders work efficiently, reduce uncertainty on the jobsite and create buildings that owners can trust for years to come. With proven durability and seamless integration across the Varco Pruden building system, Panel Rib brings practical momentum to every phase of construction and lasting reassurance long after the building is complete.

Key Benefits

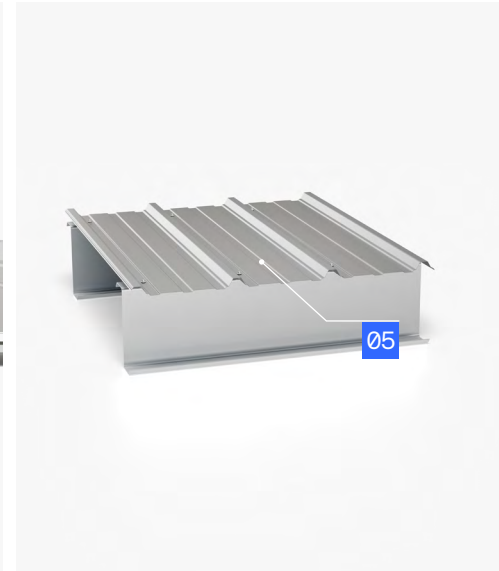

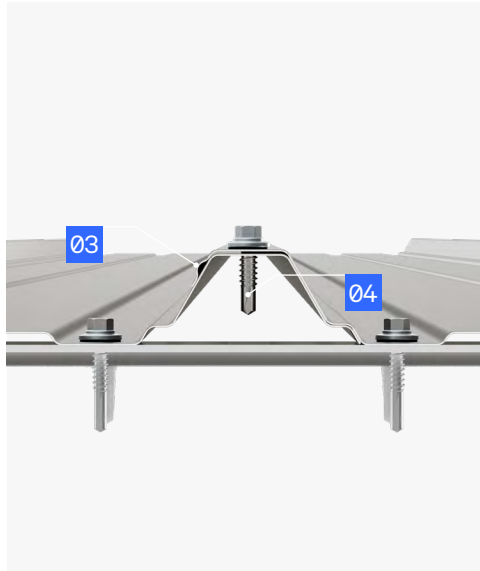

- **Faster Installation**
This system helps teams maintain momentum and meet demanding schedules.
- **Reliable Performance**
This roof remains durable despite changing conditions and long-term exposure.
- **Leak Resistance**
An engineered sidelap design protects the building investment.
- **Low Cost of Ownership**
This system reduces maintenance demands while supporting energy efficiency over time.

Let's build.

Product Features

- 01 **Factory-formed 36" panels with consistent rib geometry** offers precision alignment.
- 02 **1¼" rib height with ⅞" minor ribs** improves stiffness and reduces oil-canning.
- 03 **Engineered sidelap with anti-siphon groove** delivers enhanced leak resistance.
- 04 **Concealed fastener eave trim and closure system** for a sleek appearance.
- 05 **Designed for compatibility**, this system works seamlessly with Varco Pruden structural purlins, frames and secondary systems.

Specifications

Panel Rib™ Roof System

Panel Type	Purlin bearing edge roof panel
Panel Profile	1¾" rib height
Panel Width	36"
Panel Gauges	22, 24 and 26 gauge
Minimum Slope	½:12
Fastener Type	Exposed
Finish Options	Acrylic-coated Galvalume or KXL finishes
Insulation Options	Fiberglass blanket
Testing	UL 60 and 90 wind uplift, ASTM E1646 water penetration, ASTM E1680 air leakage
Warranty	10-year standard weathertightness warranty (special requirements for additional mastic and fasteners) and 25-year finish warranty
