

Panel Rib[™] Wall System

When builders need an exterior wall solution that installs quickly, holds up through harsh conditions and stays visually consistent over time, Panel Rib delivers confidence from day one. More than just a ribbed panel, this versatile system is part of Varco Pruden's complete building envelope. With proven strength, durable finishes and seamless compatibility with VP systems, Panel Rib helps teams simplify construction and deliver buildings owners can trust for years to come.

Choose Panel Rib when reliability, value and long-term performance matter most.

Key Benefits

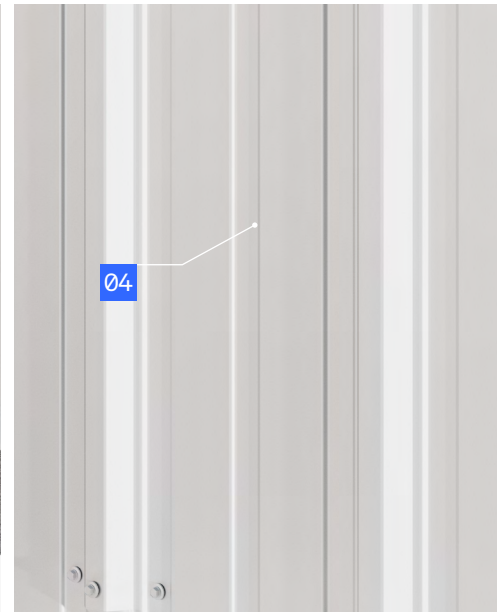

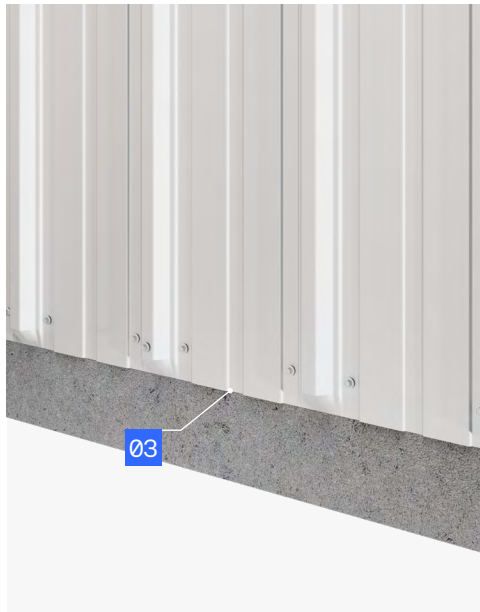

- **Proven Wall Performance**
Dependable results across diverse building applications.
- **Faster Construction**
Consistent installation keeps crews moving efficiently.
- **Long-Term Durability**
Minimal maintenance with lasting finish integrity.
- **System Compatibility**
Integrates seamlessly with VP systems.
- **Cost-Effective Flexibility**
Multiple profiles support design and budget needs.

Let's build.
