

# Tech Four<sup>TM</sup> Wall Panel

Built for projects that demand architectural presence without sacrificing performance or efficiency, Tech Four Wall Panel delivers a clean, modern façade and long-term durability. Its bold, fluted profile and embossed surface create visual depth that elevates the building while supporting a tight, weather-resistant envelope.

More than a wall panel, Tech Four is a coordinated system. Long continuous panel lengths, durable PVDF finishes and seamless integration with Varco Pruden framing and insulation help teams move faster and reduce lifecycle concerns. The result is a building exterior that looks intentional, performs reliably and delivers lasting value for owners.

Let's build. [VP.com](https://www.vp.com)

## Key Benefits

- **Architectural Confidence**  
Concealed fasteners and embossed texture create a refined exterior.
- **Faster Installation**  
Long panels reduce end laps and field labor.
- **Durable Performance**  
Galvanized steel and PVDF finishes support decades of service.
- **Improved Energy Efficiency**  
Adaptable insulation options enhance envelope performance.
- **System Coordination**  
Integrates seamlessly with VP framing, trim and insulation.

## Product Features

- 01 **24-gauge G-90** galvanized steel construction.
- 02 **16" panel width** with 2"-deep fluted profile.
- 03 **Concealed-fastener** interlocking side joints.
- 04 **Panel lengths** up to 46'.
- 05 **Embossed surface** to reduce oil canning.

## Specifications

## Tech Four™ Wall Panel

Panel Type	Embossed fluted panel
Panel Profile	2"
Panel Width	16"
Panel Gauges	24-gauge steel
Fastener Type	Concealed
Finish Options	Factory-applied KXL™ PVDF finish
Insulation Options	Fiberglass blanket
Testing	ASTM E283-91 air leakage tested, ASTM E331-86 water penetration tested
Warranty	Up to 25-year finish warranty
