

Tilt Plus™

Anyone who's built a warehouse project knows that cost, speed and coordination can make or break success. When developers and builders need a structure that goes up efficiently, looks clean inside and delivers long-term value, Tilt Plus provides a smarter path forward. By knowing the steel and concrete systems are working together from the start, teams gain confidence that schedules stay predictable and spaces stay tenant-ready.

More than a hybrid solution, Tilt Plus is a way to simplify complexity. It reduces jobsite labor, improves visual quality and supports flexible layouts that maximize usable floor space.

Let's build.

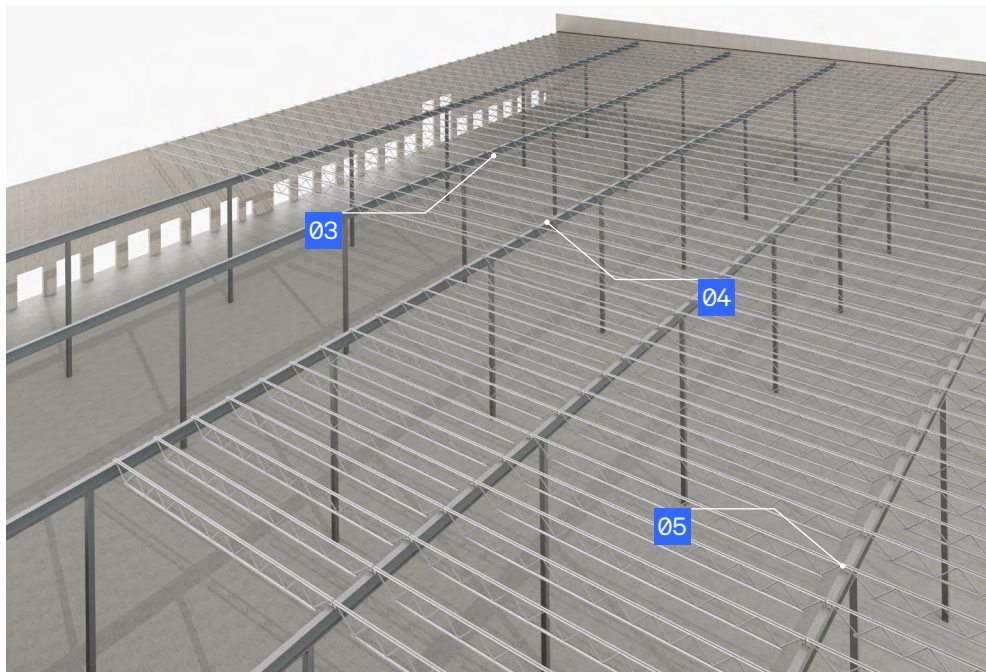

VP.com

Key Benefits

- **Lower Total Project Cost**
Lighter framing and integrated design improve efficiency.
- **Faster Delivery**
Simplified detailing and installation keeps schedules moving.
- **Tenant-ready Interiors**
Galvanized structure creates bright, high-finish spaces.
- **Improve Accuracy**
Factory-marked connection points reduce field layout time.
- **Reduced Maintenance**
Corrosion-resistant materials support long-term value.
- **Simplified Coordination**
Unified supply chain and dedicated project management ensure a smooth process.

Product Features

- 01 **Hybrid structural system** combining solid-web rafters, truss purlins and concrete tilt-up walls.
- 02 **1.5" B-deck diaphragm roof design** eliminates traditional X-bracing.
- 03 **WideBay™ Trussed Purlins** available in lengths up to 60'.
- 04 **G30 galvanized finish on truss purlins** for corrosion resistance and clean appearance.
- 05 **Minimal weld system** no welding for bridging, end seats or decking.

Specifications

Structural Type

Tilt Plus

Tilt-Wall Hybrid Steel System

Structural Role

Combination of pre-engineered and conventional components

Member Types

Pre-engineered structural frames, WideBay Trussed Purlins, precast tilt-up walls, and conventional B-deck roof systems

Standard Size

WideBay Trussed Purlins allow up to 60' spacing

Standard Material & Finish

G30 galvanized acrylic-coated structural-grade steel truss purlins and factory primed 3-plate frames

Warranty

Standard 3-year material and workmanship warranty
