

Vee Rib™ Wall System

A time-tested wall system for buildings that need distinctive architectural expression, lasting durability and reliable weather protection. The embossed or smooth profile adds depth and texture to the exterior, while the steel panel system delivers dependable performance for commercial and industrial applications.

Built for efficient installation, Vee Rib pairs durable finishes with weathertight integrity, supporting a long service life and reduced maintenance demands.

Key Benefits

- **Long-term Performance**
This wall system supports lasting value.
- **Stronger First Impressions**
The embossed or smooth profile enhances the building exterior.
- **Efficient Installation**
These panels are designed for faster installation.
- **Weather Protection**
Materials and finishes are built for demanding environments.

Let's build.
